

## NOTIFICATION

### *Addendum*

The following communication, received on 4 July 2024, is being circulated at the request of the Delegation of Canada.

---

#### Repeal and replace of Feeds Regulations, 1983 with Feeds Regulations, 2024

The Canadian Food Inspection Agency has recently published the *Feeds Regulations, 2024*. These new regulations replace the previous *Feeds Regulations, 1983*. These modernized regulations include a range of new, and updated requirements that will improve the safety of livestock feed and the food production continuum, reflect international best practices, and support innovation within the animal feed sector. These changes will be gradually introduced, either through a delayed coming into force, or the use of a transition period to allow stakeholders, including exporters, to adapt to the new regulations.

The new regulations include:

- requirements for regulated parties to develop and implement a preventive control plan which describes hazards associated with commodities and operational activities and how these risks are being mitigated (delayed coming into force of 12 months);
- requirements for more detailed record-keeping to better support risk management along the feed supply chain. Regulated parties will need to keep electronic or paper records of where feeds were purchased, and to whom they were sold, for a period of two years. (delayed coming into force of 12 months);
- updated general and safety standards for feed to better reflect current science, risks, production practices, and technology;
- licensing requirements for prescribed livestock feeds and activities for livestock feeds sold between provinces, exported and imported for sale (delayed coming into force of 18 months);
- an updated, clearer, and broader permissions approach for livestock feeds, namely for the approval of feed ingredients and registration of mixed feeds;
- new labelling requirements that require health and safety information to be in both official languages and the use of identification codes (lot numbers) on all livestock feed labels (coming into force immediately, with a 1-year transition period)
- an expanded scope of livestock species subject to the *Feeds Act and Regulations*. The following species will be added: game birds (pigeons, pheasants, partridges, quail, grouse, guinea fowl and pea fowl), ratites, bison, water buffalo, cervids, llamas, alpacas, molluscs, crustaceans, and bees. Mink and foxes will no longer be captured as they are not considered food producing animals. Cattle, horses, sheep, goats, swine, poultry (chickens, turkeys, ducks, and geese), fish, and rabbits will continue to remain in scope;
- updated and clarified exemptions from the *Feeds Act and Regulations*;
- the incorporation by reference (IBR) of various technical documents. IBR is a drafting technique used to bring the content of a document into a regulation, allowing greater flexibility to maintain an agile and flexible regulatory regime. IBR documents have the same force as the regulation into which they are incorporated. Documents incorporated into the *Feeds Regulations, 2024* include: single ingredient feeds; medicating ingredients; non-feed products allowed to be used in feed; nutrient guarantees and conditions allowed on livestock feed labels; maximum nutrient values in feed; maximum weed seeds in feed; maximum contaminant levels in feed; permissible

claims allowed on livestock feed labels; and prescribed deleterious substances.

Note: This measure is also notified to the Committee on Technical Barriers to Trade under G/TBT/N/CAN/645/Add.2.

The *Feeds Regulations, 2024* can be found:

English: [Canada Gazette, Part 2, Volume 158, Number 14: Feeds Regulations, 2024](#)

**This addendum concerns a:**

- Modification of final date for comments
- Notification of adoption, publication or entry into force of regulation
- Modification of content and/or scope of previously notified draft regulation
- Withdrawal of proposed regulation
- Change in proposed date of adoption, publication or date of entry into force
- Other:

**Comment period: (If the addendum extends the scope of the previously notified measure in terms of products and/or potentially affected Members, a new deadline for receipt of comments should be provided, normally of at least 60 calendar days. Under other circumstances, such as extension of originally announced final date for comments, the comment period provided in the addendum may vary.)**

- Sixty days from the date of circulation of the addendum to the notification and/or (dd/mm/yy): Not applicable

**Agency or authority designated to handle comments:  National Notification Authority,  National Enquiry Point. Address, fax number and e-mail address (if available) of other body:**

**Text(s) available from:  National Notification Authority,  National Enquiry Point. Address, fax number and e-mail address (if available) of other body:**
